

Introducing the Perfect Replacement for the Discontinued Pall Ultipleat high-flow filter

Finding the right replacement can be challenging when a trusted product is discontinued. That's why we're proud to introduce the perfect alternative to the Pall Ultipleat high-flow filter, offering exceptional performance, seamless compatibility, and even greater value.

Our filter is engineered to meet and exceed industry standards, ensuring you experience no disruption in quality, efficiency, or reliability. Designed as a direct replacement, Hall Pyke's high-flow filter fits perfectly into your existing system, making the transition effortless.

Features and Benefits

- A standard 40" filter can handle flow rates up to 60m³/hr
- Long service life and high dirt holding capacity
- Ergonomically designed for fast and easy change-outs
- It fits into your filter housing without any change required

Why Choose Hall Pyke's high flow?

- **Seamless Compatibility** – Designed to replace Pall & 3M filters with zero modifications required.
- **Superior Filtration** – Advanced technology ensures optimal performance and cleaner results.
- **Readily Available** – No need to worry about discontinued stock; we're here to supply your needs without interruption.
- **Trusted Performance** – Rigorously tested to meet industry standards for durability and efficiency.

Don't let product discontinuation disrupt your operations.
