Water Treatment

**ECP Series Pleated
Cellulose Polyester Cartridges**

The SMART choice for filtration

DGD Series Dual-Gradient Density Cartridges

DGD Series cartridges are manufactured from 100% pure polypropylene and are sized for use in our Big Blue® filter housings.

The DGD Series advanced design combines selective “final filtration” with appropriate “pre-filtration” to achieve up to three times the dirt-holding capacity of similar size sediment cartridges and many more times that of standard spun or string-wound cartridges. This performance enhancement is achieved by combining two separate gradient layers in one filter.

The larger diameter of the pre-filter reduces the particle load to the post filter, allowing it to operate at higher velocities.

Materials of Manufacture

Filter Media: Polypropylene

Temperature Rating

40°F to 145°F (4.4°C to 62.8°C)

Applications

- Manufactured from 100% pure polypropylene
- Designed for purity and chemical compatibility
- Two separate gradient density layers enhance cartridge performance
- Three times the dirt-holding capacity of similar sized sediment cartridges

ECP Series Pleated Cellulose Polyester Cartridges

ECP Series cartridges are manufactured from a special formulation of resin-impregnated cellulose and polyester fibers. This unique blend of materials provides a higher wet strength than regular cellulose cartridges. It also provides high flow rates and dirt-holding capacity, while maintaining extremely low pressure drop.

Features and Benefits

- Special formulation of resin-impregnated cellulose and polyester fibers
- Provides higher wet strength than regular cellulose cartridges
- Minimal unloading and media migration

Materials of Manufacture

Media: Cellulose Polyester
Core: Polypropylene
Endcaps: Vinyl Plastisol

Temperature Rating

40–125°F (4.4–51.7°C)

Micron Rating (Nominal)

ECP1-10	1
ECP5-10	5
ECP20-10	20
ECP50-10	50
