Water Treatment

**EP Series Carbon-Briquette
Cartridges**

The SMART choice for filtration

EP Series Carbon-Briquette Cartridges

EP Series cartridges are versatile and combine the long life of carbon block filtration with the higher dirt-holding capacity of wound, carbon impregnated paper cartridges like our C-1.

EP Series cartridges are manufactured using a patented process that yields a cartridge with a nominal 5-micron filtration rating, high dirt-holding capacity. A high porosity design helps prevent the cartridge from plugging before its adsorption capacity is exhausted, maximizing the utilization of the carbon while maintaining low pressure drop.

EP Series cartridges are manufactured entirely from FDA compliant materials making them an ideal choice for a wide range of residential, food service, commercial and industrial applications.

Temperature Rating

40°F to 180°F (4.4° C to 82.2°C)

Features and Benefits

- Nominal 5-micron rating*
- High dirt-holding capacity maximizes utilization of the carbon block*
- Highly effective bad taste & odor and chlorine taste & odor reduction*

Gaskets

Buna-N

Materials of Manufacture

Filter Media	Bonded PAC
End Caps	Polypropylene
Inner/Outer Wraps	Polyolefin
Netting	Polyethylene

R Series Pleated Polyester Cartridges

R Series cartridges are manufactured from a durable, non-woven and reusable polyester fabric that is suitable for a wide range of filtration uses.

Features and Benefits

- Pleated design maximizes dirt-holding capacity
- Versatile and reusable, allowing for a variety of uses
- Durable polyester media is bacteria and chemical resistant
- Nominal 30-micron rating (R30) and nominal 50-micron rating (R50)

Materials of Manufacture

Filter Media	Non-Woven Polyester
End Caps	Vinyl Plastisol
Core	Polypropylene

Temperature Rating

40°F to 125°F (4.4°C to 51.7°C)
