Lifecube Single-use Bags

Lifecube Single-use Bags

The single-use system is a process equipment solution. Compared with the traditional stainless steel system, it has the advantages of lower initial cost, no cleaning, and speeding up the development and production progress. At present, it has been widely used in the field of biopharmaceuticals, such as vaccines, antibodies, gene and cell therapy, etc., in all processes from cell culture to preparation filling.

Cobetter Lifecube single-use bags are exclusively designed by Hangzhou Cobetter Filtration Equipment Co., Ltd. The entire manufacturing process of Cobetter Lifecube single-use bags from raw material storage to product packaging is completed in the ISO Class 7 clean zones. Cobetter establishes and continuously maintains the company's quality assurance system in accordance with the requirements of ISO® 9001:2015 quality management system and cGMP. All the products are manufactured under strict quality system to ensure stable and reliable quality. Cobetter Lifecube can help you achieve simpler process, greater process efficiency and productivity, easier verification and safer products.

- The films have low extractables, low precipitation, good physical strength, chemical compatibility and biocompatibility
- High transparency film is conducive to auxiliary process judgment
- It can meet all kinds of storage and transportation needs in the biopharmaceutical processes
- Flexible custom size and tubings, suitable for various processes

Features

- The film has low level of extractables and leachables, good physical strength, chemical compatibility and biocompatibility
- Easy to process judgment for high transparency film
- Meet the requirements of various solutions storage and transfer in the biopharmaceutical process
- Flexibly design bags and tubings for various processes

Typical Applications

- Buffer and media preparation, storage and transfer
- Preparation of bioreactor feeds
- Purified components collection
- Storage of purified intermediates
- Stock solution storage and transfer
- Formulation filling

Lifecube Film I

Specifications

Netherlands Renolit 9101 and Lifemeta KA, the films of Cobetter Lifecube single-use bags, are composed of five layers. The thickness, materials and performance of each layer are given below.

Netherlands Renolit 9101 Film

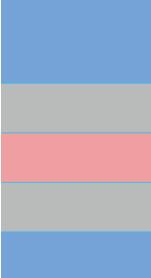

230µm	ULDPE Fluid contact layer, ultra-low density polyethylene	Low extractables & leachables, broad chemical compatibility and biological safety.
10µm	Tie Bonding layer	
20µm	EVOH Gas barrier layer, ethylene vinyl alcoho	Minimizes gas transfusion
10µm	Tie Bonding layer	
50µm	LDPE Outer layer, low density polyethylene	Protective layer

Renolit 9101 Film Specifications

Physical Property	Value (Post gamma sterilization, above 25 kGy)	Procedure
Haze	8.0 %	ASTM D-1003
Transmittance	91.7%	ASTM D-1003
Tensile Strength at Break	Transverse 15.2 Lengthways 16.0 , MPa	ASTM D-882
Elongation at Break	Transverse 320 Lengthways 320 , %	ASTM D-882
Elastic Modulus	Transverse 337 Lengthways 332 , MPa	ASTM D-882
Brittleness Temperature by Impact	below -70 °C	ISO 8570
Density	0.923 g/cm³	ASTM D-792
Water Vapor Transmission Rate	0.331 g/(m²·day) (23 °C, 100 % RH)	ASTM F-1249
Oxygen Permeability	0.322 cm³/(m²·day·bar)	ASTM D-3985
Carbon Dioxide Permeability	0.370 cm³/(m²·day·bar)	ASTM F-2476
Particulate Matter	Particulate matter in the product eluent meets the requirements in USP <788> for large volume parenterals.	
Bacterial Endotoxin	Aqueous extraction contains < 0.25 EU/mL as determined by Limulus Amebocyte Lysate (LAL),USP <85>.	
USP <87> Cytotoxicity	Meet the requirements of USP <87> in Vitro Biological Reactivity Test.	
USP <88> Biological Reactivity	Meet the criteria of the USP <88> Biological Reactivity Test for Class VI plastics.	
Indirect Food Additive	The fluid contact component materials meet the FDA Indirect Food Additive requirements cited in 21 CFR 177-182.	
Animal Derivative Content	Products do not contain animal derived components and are free from TSE risk.	
Quality Assurance	These products are manufactured in a facility which adheres to ISO® 9001:2015 Practices.	

Lifecube Film II

Lifemeta KA Film

	230µm	ULDPE Fluid contact layer, ultra-low density polyethylene	Low extractables & leachables, broad chemical compatibility and biological safety.
	25µm	Tie Bonding layer	
	20µm	EVOH Gas barrier layer, ethylene vinyl alcohol	Minimizes gas transference
	25µm	Tie Bonding layer	
	30µm	HDPE Outer layer, high density polyethylene	Protective layer

Lifemeta KA Film Specifications

Physical Property	Value (Post gamma sterilization, above 25 kGy)	Procedure
Haze	21.2 %	ASTM D-1003
Transmittance	90.2%	ASTM D-1003
Tensile Strength at Break	Transverse 21.9 Lengthways 26.7 , MPa	ASTM D-882
Elongation at Break	Transverse 380 Lengthways 420 , %	ASTM D-882
Elastic Modulus	Transverse 277 Lengthways 289 , MPa	ASTM D-882
Brittleness Temperature by Impact	below -70 °C	ISO 8570
Density	0.941 g/cm³	ASTM D-792
Water Vapor Transmission Rate	0.593 g/(m²·day) (23 °C, 100 % RH)	ASTM F-1249
Oxygen Permeability	1.024 cm³/(m²·day·bar)	ASTM D-3985
Carbon Dioxide Permeability	1.455 cm³/(m²·day·bar)	ASTM F-2476
Particulate Matter	Particulate matter in the product eluent meets the requirements in USP <788> for large volume parenterals.	
Bacterial Endotoxin	Aqueous extraction contains < 0.25 EU/mL as determined by Limulus Amebocyte Lysate (LAL),USP <85>.	
USP <87> Cytotoxicity	Meet the requirements of USP <87> in Vitro Biological Reactivity Test.	
USP <88> Biological Reactivity	Meet the criteria of the USP <88> Biological Reactivity Test for Class VI plastics.	
Indirect Food Additive	The fluid contact component materials meet the FDA Indirect Food Additive requirements cited in 21 CFR 177-182.	
Animal Derivative Content	Products do not contain animal derived components and are free from TSE risk.	
Quality Assurance	These products are manufactured in a facility which adheres to ISO® 9001:2015 Practices.	

Lifecube 2D/3D Single-use Bags

Quality Assurance

- ISO® 9001:2015 quality management system
- ISO Class 7 clean zones
- 100% leak testing for Lifecube® 2D single-use bags
- ADCF raw materials
- Meet the FDA Indirect Food Additive requirements cited in 21 CFR 177-182
- Meet the requirement of USP <87> In Vitro Biological Reactivity Test
- Meet the criteria of the USP <88> Biological Reactivity Test for Class VI plastics
- Aqueous extraction contains < 0.25 EU/mL as determined by Limulus Amebocyte Lysate (LAL), USP <85>
- Particulate matter in the product eluent meets the requirements in USP <788> for large volume parenterals
- Verify gamma irradiation dose according to ISO® 11137
- Provide product Validation Guide and Certificate of Quality

Features

- Good physical strength and excellent biological safety
- Integrated bag body designed for Lifecube® 2D single-use bags and less residual liquid
- Double-layer sterile packaging sterilized by 25-45 kGy gamma irradiation
- Variable and flexible customized services
- Various and scalable

Typical Applications

- Buffer and media storage and transfer after filtration
- Intermediates storage
- Stock solution storage
- Formulation filling

Lifecube AS Single-use Sampling Bags

Quality Assurance

- ISO® 9001:2015 quality management system
- ISO Class 7 clean zones
- 100% leak testing
- ADCF raw materials
- Meet the FDA Indirect Food Additive requirements cited in 21 CFR 177-182
- Meet the requirement of USP <87> In Vitro Biological Reactivity Test
- Meet the criteria of the USP <88> Biological Reactivity Test for Class VI plastics
- Aqueous extraction contains < 0.25 EU/mL as determined by Limulus Amebocyte Lysate (LAL), USP <85>
- Particulate matter in the product eluent meets the requirements in USP <788> for large volume parenterals
- Verify gamma irradiation dose according to ISO® 11137

Features

- Good physical strength and excellent biological safety
- Integrated bag body and less residual liquid
- Double-layer sterile packaging sterilized by 25-45 kGy gamma irradiation
- Various choices for sampling application
- Variable and flexible customized services

Typical Applications

- Sampling with single-use bags
- Secondary sampling from sampling bag
- Store samples after sampling

Buffer and Media Applications

Lifemeta STD Pt-cured Silicone Tubing

Supporting Containers

- Supporting container with 2D storage bag, 3D storage bag and 3D mixing bag;
- The material is 304L, and the outer surface can be mechanical polished or electro-polished;
- The box can be square or round. Single layer or multiple layers (with stainless steel jacket for temperature control);
- Optional weighing module, temperature transmitter, bottom magnetic mixing, pH, conductivity, dissolved oxygen, TCU equipment, HMI, data storage system;
- With special polyurethane universal casters for clean areas, which can move flexibly;
- The outlet at the bottom of the box is convenient for drainage;
- The side of the project can adopt an operating door and a viewing window to facilitate observation of the liquid state

Features

- The container to support the bag can be provided separately to match the bag of the competing bags; it can also be matched with the company's own products
- The factory has more than 3,000 m² housing manufacturing workshops, which can efficiently provide stainless steel cabinets and support systems;
- A complete quality system can cooperate with customers to complete the calibration work of the trolley system;
- The after-sales service responds quickly, 24h response.

Product Type

- 2D storage bag supporting tray, multi-layer tray;
- 50L-3000L liquid storage support container;
- 50L-2000L stirring support container.

Lifecube SA Single-use Assemblies

Quality Assurance

- ISO® 9001:2015 quality management system
- ISO Class 7 clean zones
- 100% leak testing
- ADCF raw materials
- Meet the FDA Indirect Food Additive requirements cited in 21 CFR 177-182
- Meet the requirement of USP <87> In Vitro Biological Reactivity Test
- Meet the criteria of the USP <88> Biological Reactivity Test for Class VI plastics
- Aqueous extraction contains < 0.25 EU/mL as determined by Limulus Amebocyte Lysate (LAL), USP <85>
- Particulate matter in the product eluent meets the requirements in USP <788> for large volume parenterals
- Verify gamma irradiation dose of sterile packaging according to ISO® 11137

Features

- Provide common used connector assemblies
- Double-layer sterile packaging sterilized by 25-45 kGy gamma irradiation
- Provide non-sterile packaging that can be autoclaved
- Variable and flexible customized services

Typical Applications

- Connect single-use system to stainless steel system
- System connections with different connectors
- Easy to connect with different brands bags

Lifemeta Pharmaceutical Grade Connectors

Quality Assurance

- ISO® 9001:2015 quality management system
- ISO Class 7 clean zones
- ADCF raw materials
- Meet the FDA Indirect Food Additive requirements cited in 21 CFR 177-182
- Meet the requirement of USP <87> In Vitro Biological Reactivity Test
- Meet the criteria of the USP <88> Biological Reactivity Test for Class VI plastics
- Aqueous extraction contains < 0.25 EU/mL as determined by Limulus Amebocyte Lysate (LAL), USP <85>
- Particulate matter in the product eluent meets the requirements in USP <788> for large volume parenterals

Lifemeta SF Line to Line Connectors Features

- Polypropylene material. Can be sterilized by gamma irradiation at 25-45 KGY or autoclaved 30 minutes at 126°C
- Can connect with multi pipelines in different sizes of flexible tubings
- Cobetter Self-manufactured, variable and flexible customized services

Lifemeta EC Quick Couplers Features

- No size limit. Can connect freely between Male and Female connectors
- No sterilization method limit (gamma irritation and autoclave irritation) . Can connect freely between Male and Female connectors
- Polysulfone material. Can be sterilized by gamma irradiation at 25-45 KGY or autoclaved 60 minutes below 132°C
- Withstand bursting pressure at room temperature from 3.09 to 4.26 Mpa
- Cobetter Self-manufactured with short delivery time
