

ASEPTIQUIK® W SERIES CONNECTORS

Genderless AseptiQuik® W Series Connectors with nominal 1 ½" flow path enable quick and easy sterile connections, in large-volume, high-flow production and process intensification environments. The genderless design simplifies system integration and minimizes the risk of operator error. The connectors' robust construction provides reliable performance without the need for clamps or fixtures. Biopharmaceutical manufacturers benefit from interchangeable 1", 1 ¼", and 1 ½" termination sizes for full-scale bioprocessing production environments with the quality and market availability they expect from the leader in the single-use connection technology.

TYPICAL FLOW RATE:

Cv Value Range: 39-118 for AseptiQuik W

Cv values represent the approximate expected flow rate in gallons per minute of water at room temperature for a 1 PSI pressure drop. The flow is generally constrained by the smallest diameter, which in some cases will be the termination diameter and not the Nominal Flow Path.
